

Clinical Decision Support

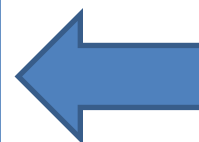

Implementation Date for Clinical Decision Support is January 1, 2023

Please continue to provide RIMI with proper Clinical Decision Support (CDS) documentation through the rest of 2022. This is the testing period for the Centers for Medicare and Medicaid Services.

During this testing period, we ask our referring providers to prepare and participate in this program. Referring providers that order Medicare Part B and Railroad Medicare for advanced diagnostic imaging services (CT and MRI exams only) must consult the Appropriate Use Criteria (AUC) through a qualified Clinical Decision Support Mechanism (CDSM). This includes orders that list both Medicare Part B and Railroad Medicare as primary insurance.

The referring office must provide the appropriate documentation to the imaging facility so they can report the AUC consultation information on their Medicare claims. Rhode Island Medical Imaging (RIMI) suggests you use the Clinical Decision Support Mechanism (CDSM) called CareSelect (<https://openaccess.careselect.org/registration>). Please see the reverse side for a complete listing. If you use an electronic medical record this information might already be included on your referrals.

Please visit our website at www.rimirad.com, click “For Providers,” and select “Clinical Decision Support” for more information or scan the QR Code below using your smartphone camera.

Clinical Decision Support

Section 1: G Codes for Clinical Decision Support

You only need to select one Clinical Decision Support Mechanism (CDSM) for your practice to utilize. The corresponding G Code must be included on all CT/MR orders when using the ME, MF, or MG Modifier (highlighted in Section 2 in blue below). If you qualify for an Exemption Modifier highlighted in red below, you do not need to include the G Code on that order.

Our Practice's CDSM G Code and Company: _____

G1001	eviCore	G1014	InveniQA's Semantic Answers in Medicine
G1002	MedCurrent	G1015	Reliant Medical Group
G1003	Medicalis	G1016	Speed of Care
G1004	National Decision Support CareSelect™	G1017	HealthHelp
G1007	AIM Specialty Health	G1018	INFINX
G1008	Cranberry Peak	G1019	LogicNets
G1009	Sage Health Management Solutions	G1020	Curbside Clinical Augmented Workflow
G1010	Stanson	G1021	E*HealthLine
G1012	AgileMD	G1022	Intermountain
G1013	EvidenceCare's	G1023	Persivia

Section 2: Modifiers for Clinical Decision Support (Select One Modifier Below)

Modifiers	The order for this service ...
ME	... adheres to the appropriate use criteria in the clinical decision support mechanism consulted by the ordering professional.
MF	... does not adhere to the appropriate use criteria in the qualified clinical decision support mechanism consulted by the ordering professional.
MG	... does not have appropriate use criteria in the clinical decision support mechanism consulted by the ordering professional.
Exemption Modifiers	The ordering professional is not required to consult a CDSM due to ...
MA	... the service is being rendered to a patient with a suspected or confirmed emergency medical condition.
MB	... the significant hardship exception of insufficient internet access.
MC	... the significant hardship exception of electronic health record or CDSM vendor issues.
MD	... the significant hardship exception of extreme and uncontrollable circumstances.
