

Women's Cancer Screening Program

Rhode Island Medical Imaging (RIMI) knows how important screening mammography is for women over 40. Mammograms save lives.

In partnership with the Rhode Island Department of Health's Women's Cancer Screening Program, RIMI offers patients breast cancer screenings as well as follow-up services to uninsured or under-insured women who live in Rhode Island.

If you have a high deductible or co-pay related to these procedures that you cannot afford or if your health insurance has denied you coverage, please contact the **Women's Cancer Screening Program at 401-222-4324**.
