

State-Of-The-Art MRI

3T MRI

- Provides the fastest scanning times and the highest quality images available
- Offers sophisticated imaging procedures not available on lower Tesla strength scanners (i.e. Prostate and Liver Elastography MRI)
- Has a spacious 70 centimeters opening that can comfortably accommodate most patients up to 83 inches in circumference and 500 pounds
- Available at 5 RIMI locations with evening and weekend hours
Barrington – East Greenwich – Pawtucket – Warwick

1.5T MRI

- Provides fast scanning times and excellent quality images
- Offers special metal artifact reduction software protocols for patients with implanted metal hardware and other medical devices
- Available at 8 RIMI locations with evening and weekend hours
**Cranston – East Greenwich – East Providence
Johnston – Lincoln – Pawtucket – Wakefield**

1.2T Open MRI

- Provides the highest quality open-style MRI images available
- The open architecture allows patients to stretch out their arms and turn their head sideways during most exams
- Ideal for claustrophobic patients
- Available at 2 RIMI locations with evening and weekend hours
Cranston – North Providence
